

Worksheet 2 — Analysing and Communicating Data

2025-08-26

1 Purpose

Practise processing, analysing and communicating data using appropriate graphs, models and terminology.

2 Outcomes (map)

- INS11-12-4: Selects and processes data and information
- INS11-12-5: Analyses and evaluates data and information
- INS11-12-7: Communicates scientific understanding

3 Tasks

- 1) Compute descriptive statistics (mean, median, standard deviation) for the provided dataset (SI units).
- 2) Plot an appropriate graph and identify trends; comment on outliers.
- 3) Propose an appropriate model (linear/exponential/other) and justify.
- 4) Write a 150-word abstract communicating findings to a non-expert audience.

TO-VERIFY: Replace dataset with context-relevant values.
